

INDEX TO VOLUME XLII

- A**-AMINO acids and peptones, effect of on growth of cells in vitro, 597.
 Acid base equilibrium in body, 587.
 Acidity, relation of to renal function, 163.
 Acids and alkalies, influence of on dextrose concentration of blood, 193.
 Adrenal glands, conditions of activity in, 616.
 Adrenalin, effect of on muscular fatigue and limb circulation, 610.
 —, — upon sphincter muscle of iris, 608.
 Adrenin, effect of on coagulation, 46.
 AGNEW, J. H. See RYAN and AGNEW, 599.
 Alcohol, inhibition of bioluminescent solution, 606.
 Alkalies and acids, influence of on dextrose concentration of blood, 193.
 ALLEN, F. M. Observations concerning fat feeding, 583.
 ALMEIDA, A. O. DE. Researches on the exchange of energy in live animal tissues. II. Study on the liver, 359.
 ALVAREZ, W. C. VI. Differences in latent period and form of contraction curve in muscle strips from different parts of the frog's stomach, 422.
 —. VII. Differences in latent period and form of contraction curve in muscle strips from different parts of mammalian stomach, 435.
 Ammonia of gastric juice, 404.
 Amphibia and reptilia, gastric hunger contractions in, 56.
 Amphibian larvae, staining of, 124.
 Anti-neuritic substances from egg yolk, 610.
 Antithrombin and thrombin of blood serum, combination of, 608.
 Apparatus, 616, 617, 620.
 ARKIN, A. The influence of an oxidizing substance on the catalase value of the blood, 603.
 Artery movements in compression chamber during blood pressure estimations, 588.
 Atrio-ventricular connection in turtle, 89, 513.
 Auricle, influence of vagus nerves on, 133.
 Auricular node, effects of removal of, 611.
 — systole, time relations of, 141.
BAITSELL, G. A. The transformation of the plasma clot, 608.
 Bile constituents, effect of feeding, 280.
 —, influence of on bile pigment secretion, 280.
 — feeding, influence of on whole bile and bile pigment secretion, 264.
 — pigment metabolism, 256, 264, 280, 544.
 BILLINGSLEY, P. R. See RANSON and BILLINGSLEY, 9, 16.
 Bioluminescence, studies on, 318, 342, 349.
 BLEILE, A. M. An application of Boyle's law and Avogadro's law to the oscillations of the manometer in clinical measurements of blood pressure, 603.
 Blood, catalase value of, affected by oxidizing substances, 603.
 — coagulation, mechanism of, 610.
 —, dissolved substances in, 163.

- Blood, effect of injection of alkaline solutions on, 460.
 —, factors affecting coagulation time of, 46.
 — feeding, bile pigment output and, 256.
 — in diabetes, diastatic activity of, 582.
 —, influence of acids and alkalies on dextrose concentration of, 193.
 — lipoids in nephritis, 586.
 — pressure and pulse velocity, 613:
 — — — — — urine formation, 592.
 — — — — — effect of music on, 616.
 — — — — — physical training on, 590.
 — — — in man, effects of partial and complete occlusion of blood vessels on, 290.
 — — — measurements, application of Boyle's law and Avogadro's law, 603.
 — — — — — movements of artery in, 588.
 — —, proteolytic ferments of, 558.
 — — serum, combination of thrombin by antithrombin of, 608.
 — — — —, prothrombin and thrombin in, 378.
 — — — vessels, occlusion of in man, 290.
 — — — — of liver, glycogen in, 619.
 BLOOR, W. R. Blood lipoids in nephritis, 586.
 Bone marrow, isolated, considerations of, 615.
 Bromide-ion, stimulating action of on smooth muscle, 595.
 BROWN, W. H. and L. PEARCE. Primary serotal syphilis of the rabbit and its utilization in chemotherapeutic experiments, 615.
 BULL, C. G. The so-called experimental streptococcic poliomyelitis, 616.
 BURBY, W. See DRAGSTEDT, BURBY and CARLSON, 615.
 BURGE, W. E. A comparison of the amount of catalase in the muscles of active and inactive animals, 600.
 BURGE, W. E. The cause of cataract, 615.
 — and A. J. NEILL. Comparison of the amount of catalase in muscles of large and of small animals, 373.
 BURROWS, M. T. See NEYMANN and BURROWS, 597.
 —. The oxygen pressure necessary for cellular activity, 614.
 BURTON-OPITZ, R. Depressor function of the thoracic sympathetic nerve and its connections, 498.
 CAFFEINE and food, effect of on work, 615.
 CANNON, W. B. and C. M. GRUBER. Oscillatory variations in the contractions of rhythmically stimulated muscle, 36.
 — and H. F. PIERCE. Some observations on the conditions of activity in the adrenal glands, 616.
 Carbon dioxide, effect of on respiratory and cardiovascular centers, 612.
 Cardiogram, human, effect of music on, 616.
 Cardio-skeletal quotient, 601.
 Cardiovascular centers, effect of carbon dioxide on, 612.
 CARLSON, A. J. See DRAGSTEDT, BURBY and CARLSON, 615.
 —. See RUPP, MEYER and CARLSON, 602.
 CARPENTER, T. M. Physiological effects of ethyl alcohol when injected into the rectum with special reference to the gaseous exchange, 605.
 Cassiopea, nerve conduction in, 469.
 Catalase in muscles of active and inactive animals, 600.
 — — — — — large and small animals, 373.
 — of blood, influence of oxidizing substances on, 603.
 Cataract, cause of, 615.
 Cell protoplasm, visible structure of, 596.
 Cells in vitro, growth of, 597.

- Cellular activity and oxygen pressure, 614.
- Central nervous system during hibernation, 619.
- Cerebral heat centers, 603.
- CHAMBERS, JR., R. The visible structure of cell protoplasm and death changes, 596.
- CHANDLER, W. L. See DRESBACH and CHANDLER, 604.
- Chicken, respiration in, 617.
- , effect of certain foodstuffs on growth, 620.
- Chitin, hydrolytic products of, 616.
- Cholesterol content of lipoids of blood in renal conditions, 586.
- Chromatophores of fishes, physiology of, 595.
- CLOWES, G. H. A. On the mechanism of blood coagulation, 610.
- Coagulation, effect of adrenin on, 46.
- COLE, L. G. Motor phenomena of the stomach, pylorus and cap observed Roentgenographically, 618.
- Colloids of blood, retention of sugar and urea, 163.
- COOMBS, H. C. See PIKE and COOMBS, 395.
- , The mechanism of the regulation of the intra-abdominal pressure, 615.
- Cotton seed as food, 585.
- Creatinine in muscles of cat, 600.
- CURL, H. See ROOT and CURL, 615.
- DAWSON, P. M.** Effects of physical training on pulse and blood pressures during activity and during rest, 590.
- , Pulse velocity and blood pressure. An attempt to determine the variations of elasticity in the walls of living arteries, 613.
- DEAN, JR., A. See WIGGERS and DEAN, 476, 615, 620.
- Depancreatized dogs and fat absorption, 596.
- Depressor function of thoracic sympathetic nerve, 498.
- reflex, afferent spinal path of, 9.
- Dextrose, intravenously injected, fate of, 615.
- retention by liver and muscles, 193.
- Diabetes, diastatic activity of blood in, 582.
- Diastatic activity of blood in diabetes, 582.
- Diuretics, action of on denervated kidney, 593.
- DRAGSTEDT, L. R., W. BURBY and A. J. CARLSON. On the toxemia of intestinal obstruction, 615.
- DRESBACH, M. and W. L. CHANDLER. Some physiological disturbances induced in animals by nitrobenzol fumigation, 604.
- DRINKER, C. K., H. A. KREUTZMAN and J. R. PAUL. Some considerations of the isolated bone marrow, 615.
- DU BOIS, E. F. and G. F. SODERSTROM. The vaporization of water from skin and respiratory passages in health and disease, 604.
- ECK** fistula and bile pigment output, 544.
- Egg yolk, anti-neuritic substances from, 610.
- Electrode, non-polarizable, for class use, 620.
- Electromyogram, human, effect of temperature changes on, 228.
- ELLIOTT, B. L. Observations on the effects of partial and complete occlusion of blood vessels on the general blood pressure in man, 290.
- Endermic reactions, 616.
- Endothelium, lymphatic, staining of, 124.
- Energy exchange in liver, 359.
- Epinephrin liberation from adrenals into blood, rate of, 585.

- EPSTEIN, A. A. and M. A. ROTH-SCHILD. Concerning lipoids of the blood in renal conditions, with special reference to cholesterol content, 586.

Splenectomy causes many interesting reactions in bile fistula dogs, but it does not influence the output of bile pigments under normal conditions. Splenectomy has no effect upon these blood feeding experiments.
